Synthetic threshold study: page 1

Left body page 1: The synthetic consistency threshold is 0.85 and the case-frequency threshold is two.

Cross-line sentence page 1: We compare the synthetic threshold
with the baseline before interpreting any cases.

Every author and observation in this document is synthetic and intended only for editor acceptance.

Right body page 1: A higher consistency cutoff changes which synthetic cases satisfy the rule.

Right-column cross-line sentence: The measurement stays fixed
while the evidence is checked on the following line.

No claim in this fixture is an empirical finding.

Synthetic threshold study: page 2

Left body page 2: The synthetic consistency threshold is 0.85 and the case-frequency threshold is two.

Cross-line sentence page 2: We compare the synthetic threshold
with the baseline before interpreting any cases.

Every author and observation in this document is synthetic and intended only for editor acceptance.

Right body page 2: A higher consistency cutoff changes which synthetic cases satisfy the rule.

Right-column cross-line sentence: The measurement stays fixed
while the evidence is checked on the following line.

No claim in this fixture is an empirical finding.
